

# COVID-19 cases

USA data: (none)

World data: [https://covid.ourworldindata.org/data/ecdc/total\\_cases.csv](https://covid.ourworldindata.org/data/ecdc/total_cases.csv)

Growth rate uses exp-weighted-mean ( $T_{1/2} = 5d$ ) smoothed case counts

**\*\*NOTE\*\***: rate calculation is incorrect! it does not account for recovered population.

Analysis: Seth R Johnson, Ph.D.
